[REDACTED] Comment: Specifications for reparation deliveries are computed by the Land government at Dresden only on a quarterly basis. As a result quarterly figures could not be obtained at this time. A comprehensive survey of reparation deliveries of the VVB GUS (Guss-und Schmiedezeugnisse) for the entire Eastern Zone in the first quarter of 1949 shows that of the total production of 29 million Ostmarks, 25.8 percent was listed as reparations. The calculations of these firms do not include deliveries to the Red Army under the category of reparations. As the figures of Maier & Weichelt indicate, deliveries to the Red Army over several quarterly periods are much larger than reparation deliveries. This is also the experience of other firms but exact figures are not available.
